Welcome to Tropika Furniture

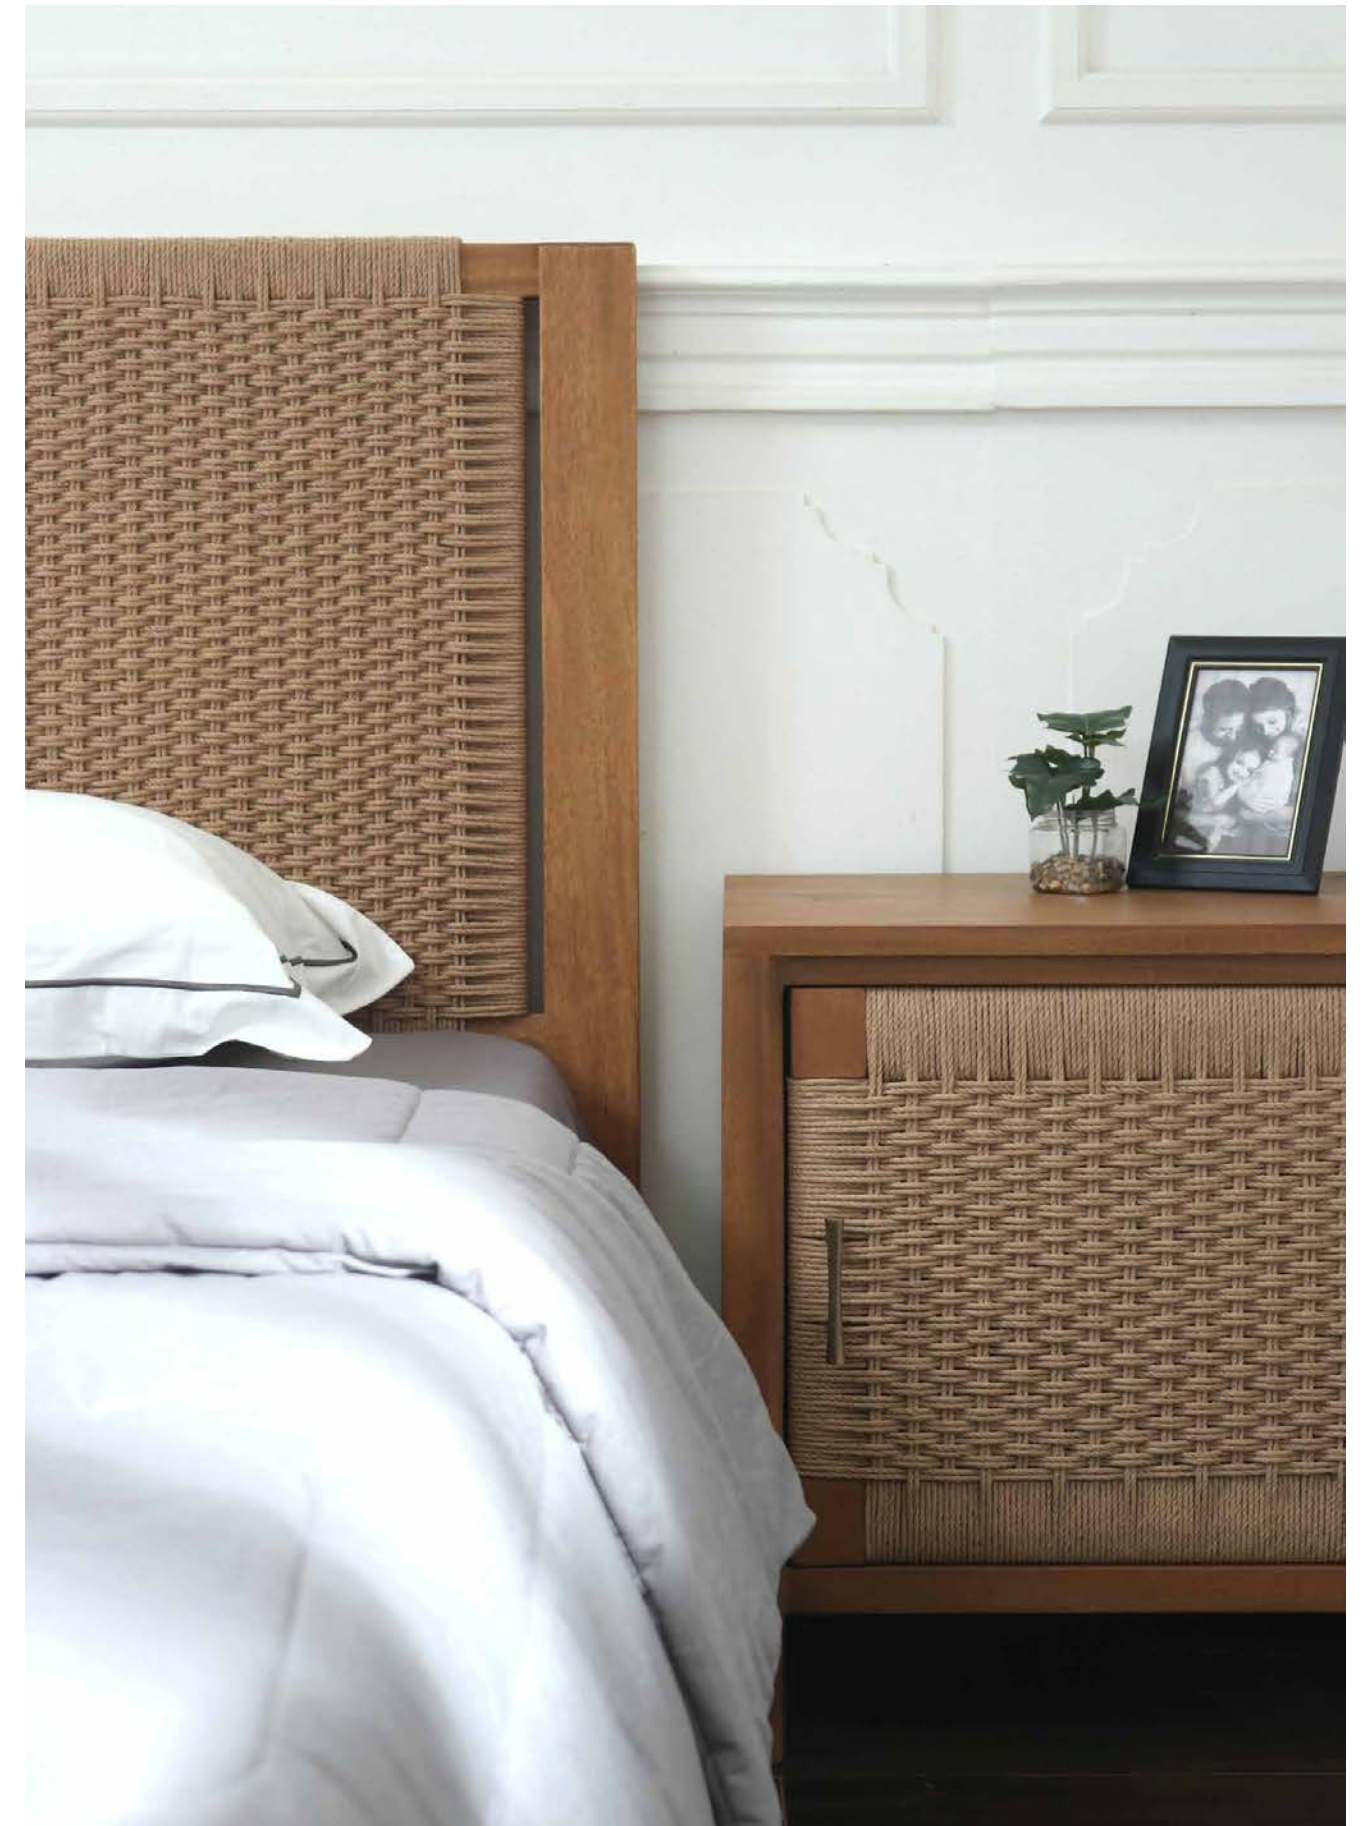

We are importers of premium furniture and décor offering affordable imported, trending luxury pieces at your convenience. We are more than a furniture store. We customize our designs to fit our client's style and personality with "Made to Order" pieces of furniture and artifacts. Our products come in a wide variety of styles, colors, finishes, and fabrics. No matter what you want to furnish, we guide you to get that perfect resource and help you make the right choice. We have a strong sourcing base in South East Asian countries and our team has extensive knowledge about all the small and prominent manufacturers and suppliers located in Indonesia, China, Vietnam and Malaysia.

We are devoted to surpassing your expectations with our premium products and our client value proposition.

DISCUSSION

Our Process

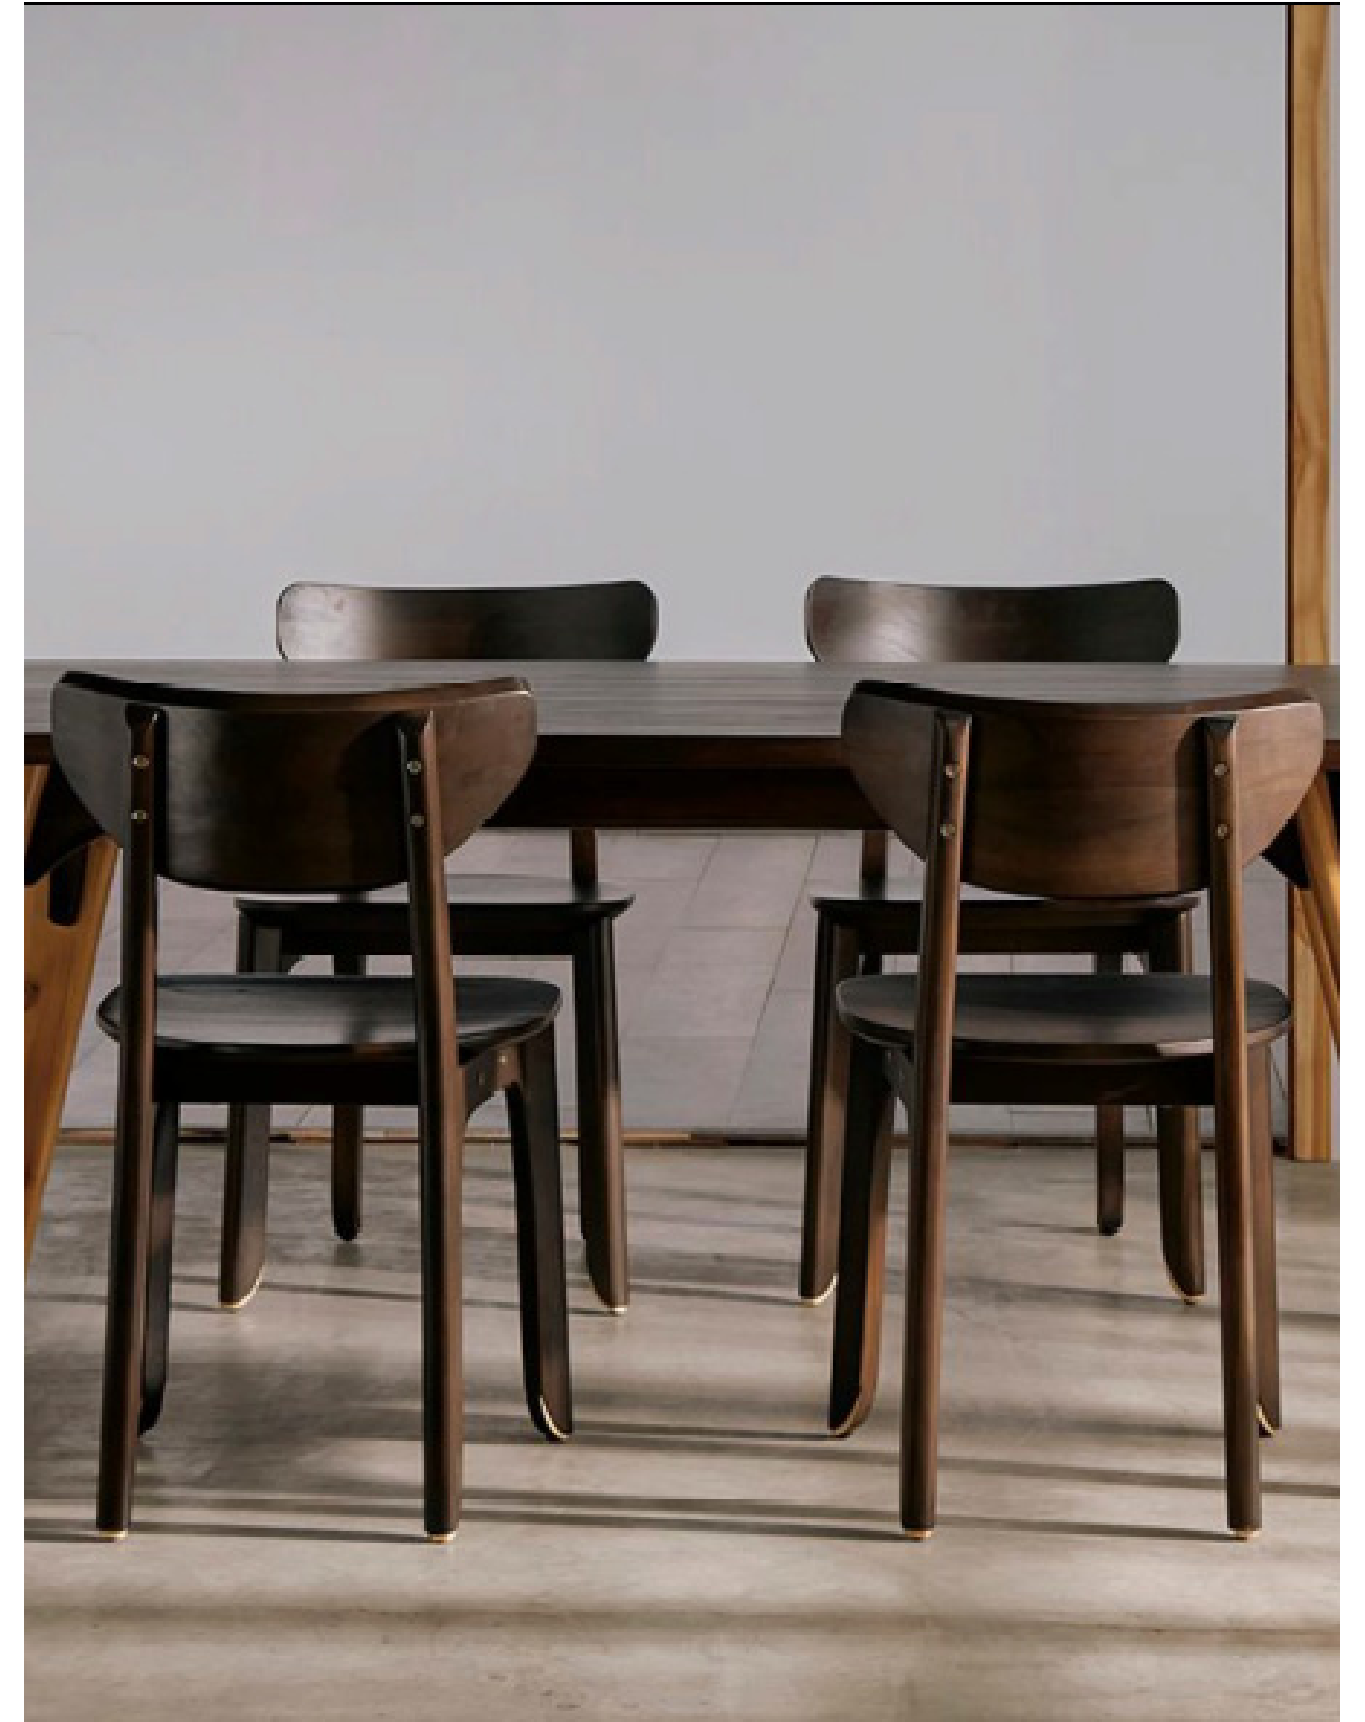

Our process begins with our initial meeting where we share the samples and swatches of the material and fabric that we work with for you to get an idea of the possible material options available to choose from. Virtual video calls are also organized at our client's convenience. Post reviewing your needs, understanding your budget and preferences like size, color, material, we take you through our wide range of e-catalogs and pictures from which you can choose to comprehend your taste.

PRODUCT SOURCING

Our Process

We record your wishlist through the initial briefing, assess your space, & pick the right skilled craftsmen & manufacturers from our comprehensive list of suppliers around Asia to execute your order. Based on our clients' convenience, we either travel together to the source countries. We have video calls for clients who cannot accompany us for shopping and help them rummage through warehouses finding that special item! We show you the products, get your feedback & approval to proceed with the design.

SELECTION & DESIGN

Our Process

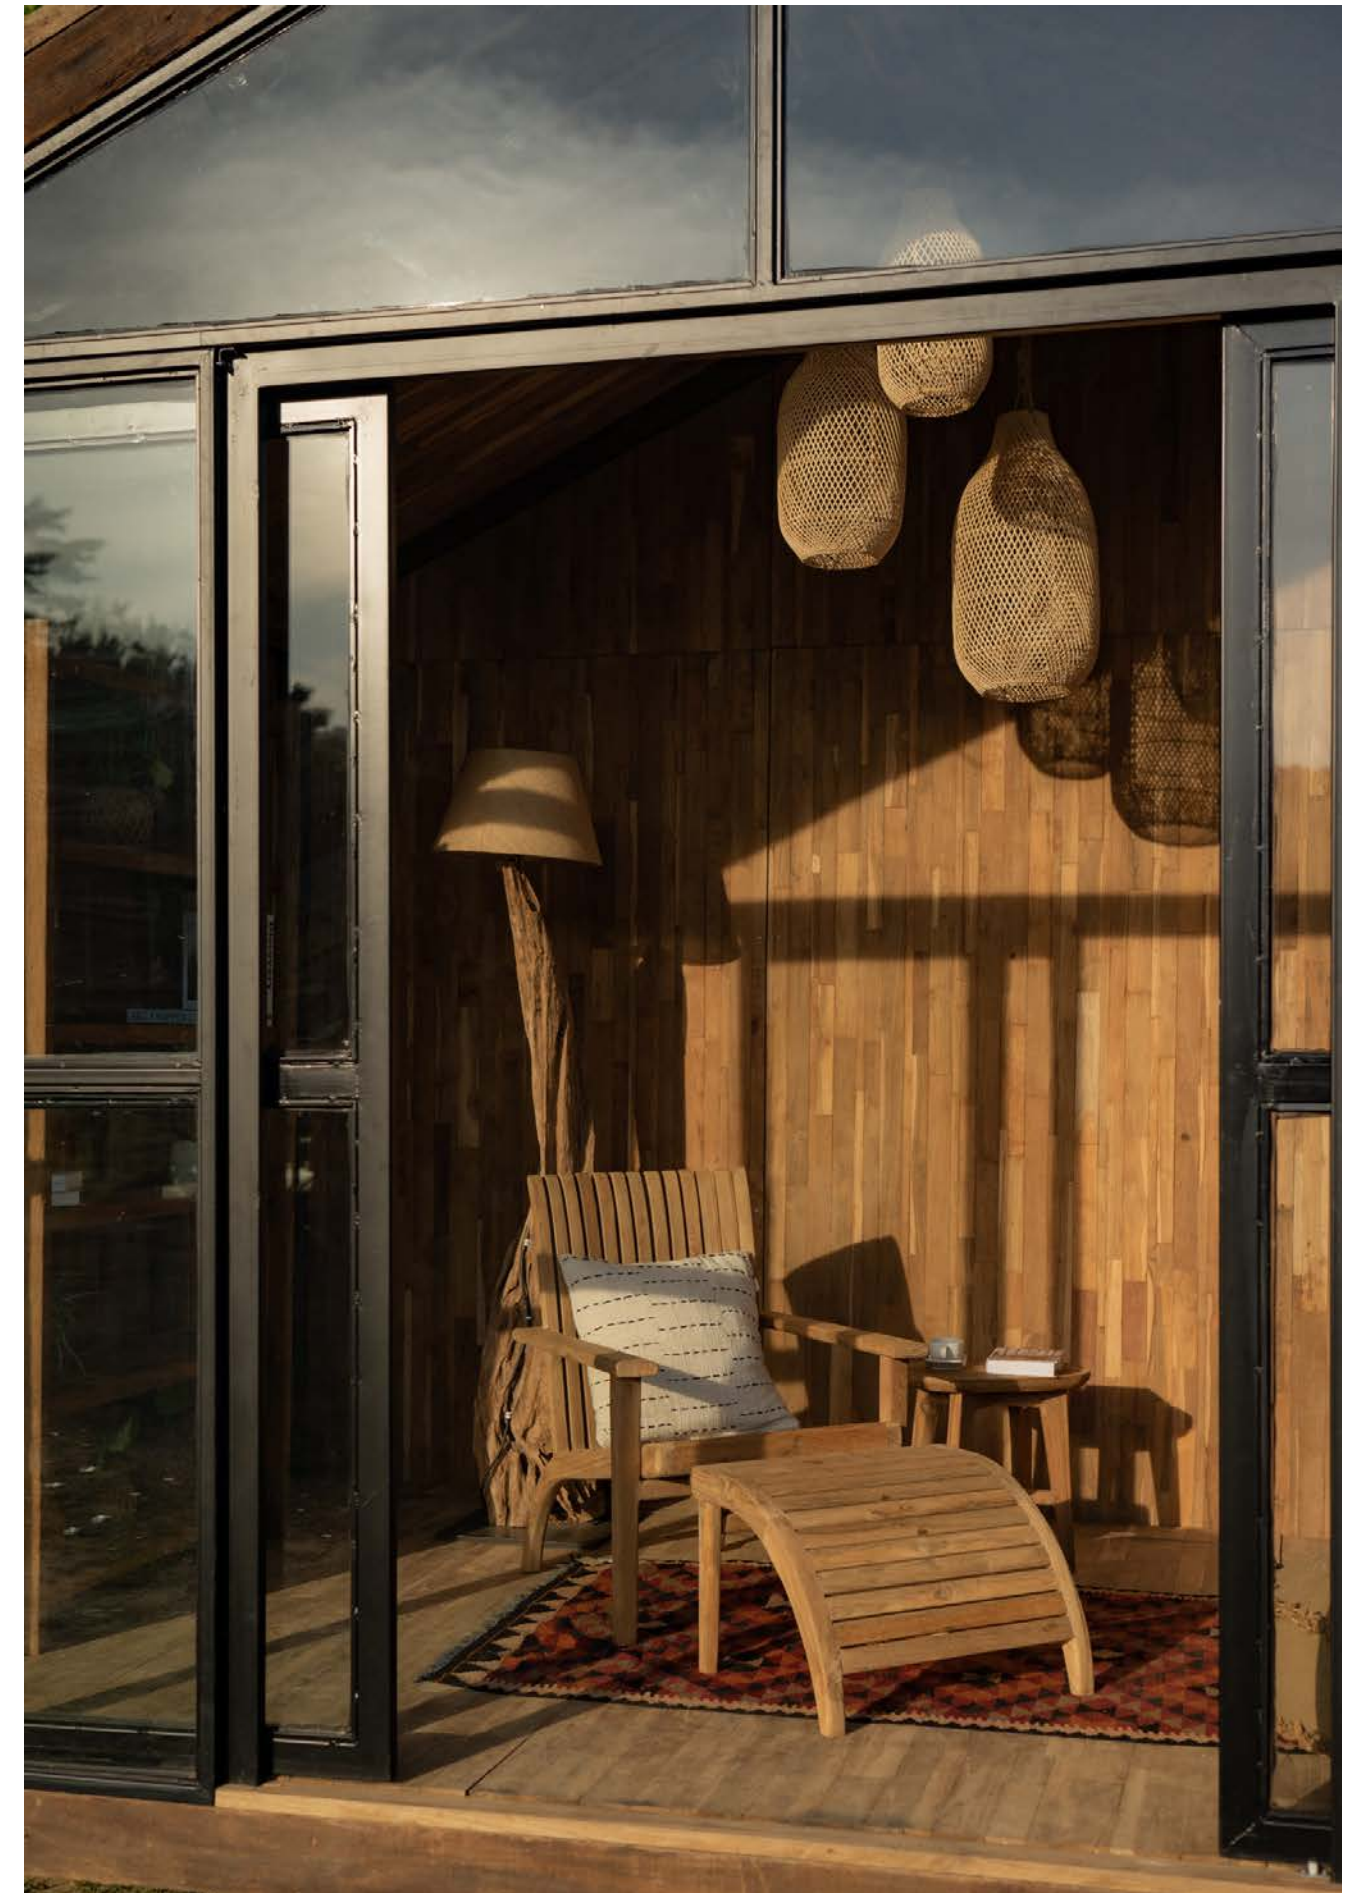

Don't confine yourself! We offer a plethora of products, designs, materials, & countries to choose from. Based on your input, we submit a concept board for your project. We can customize existing designs, or we can create a totally new design. We work closely with you to recreate your vision.

ORDER FINALISATION & PRODUCTION

Our Process

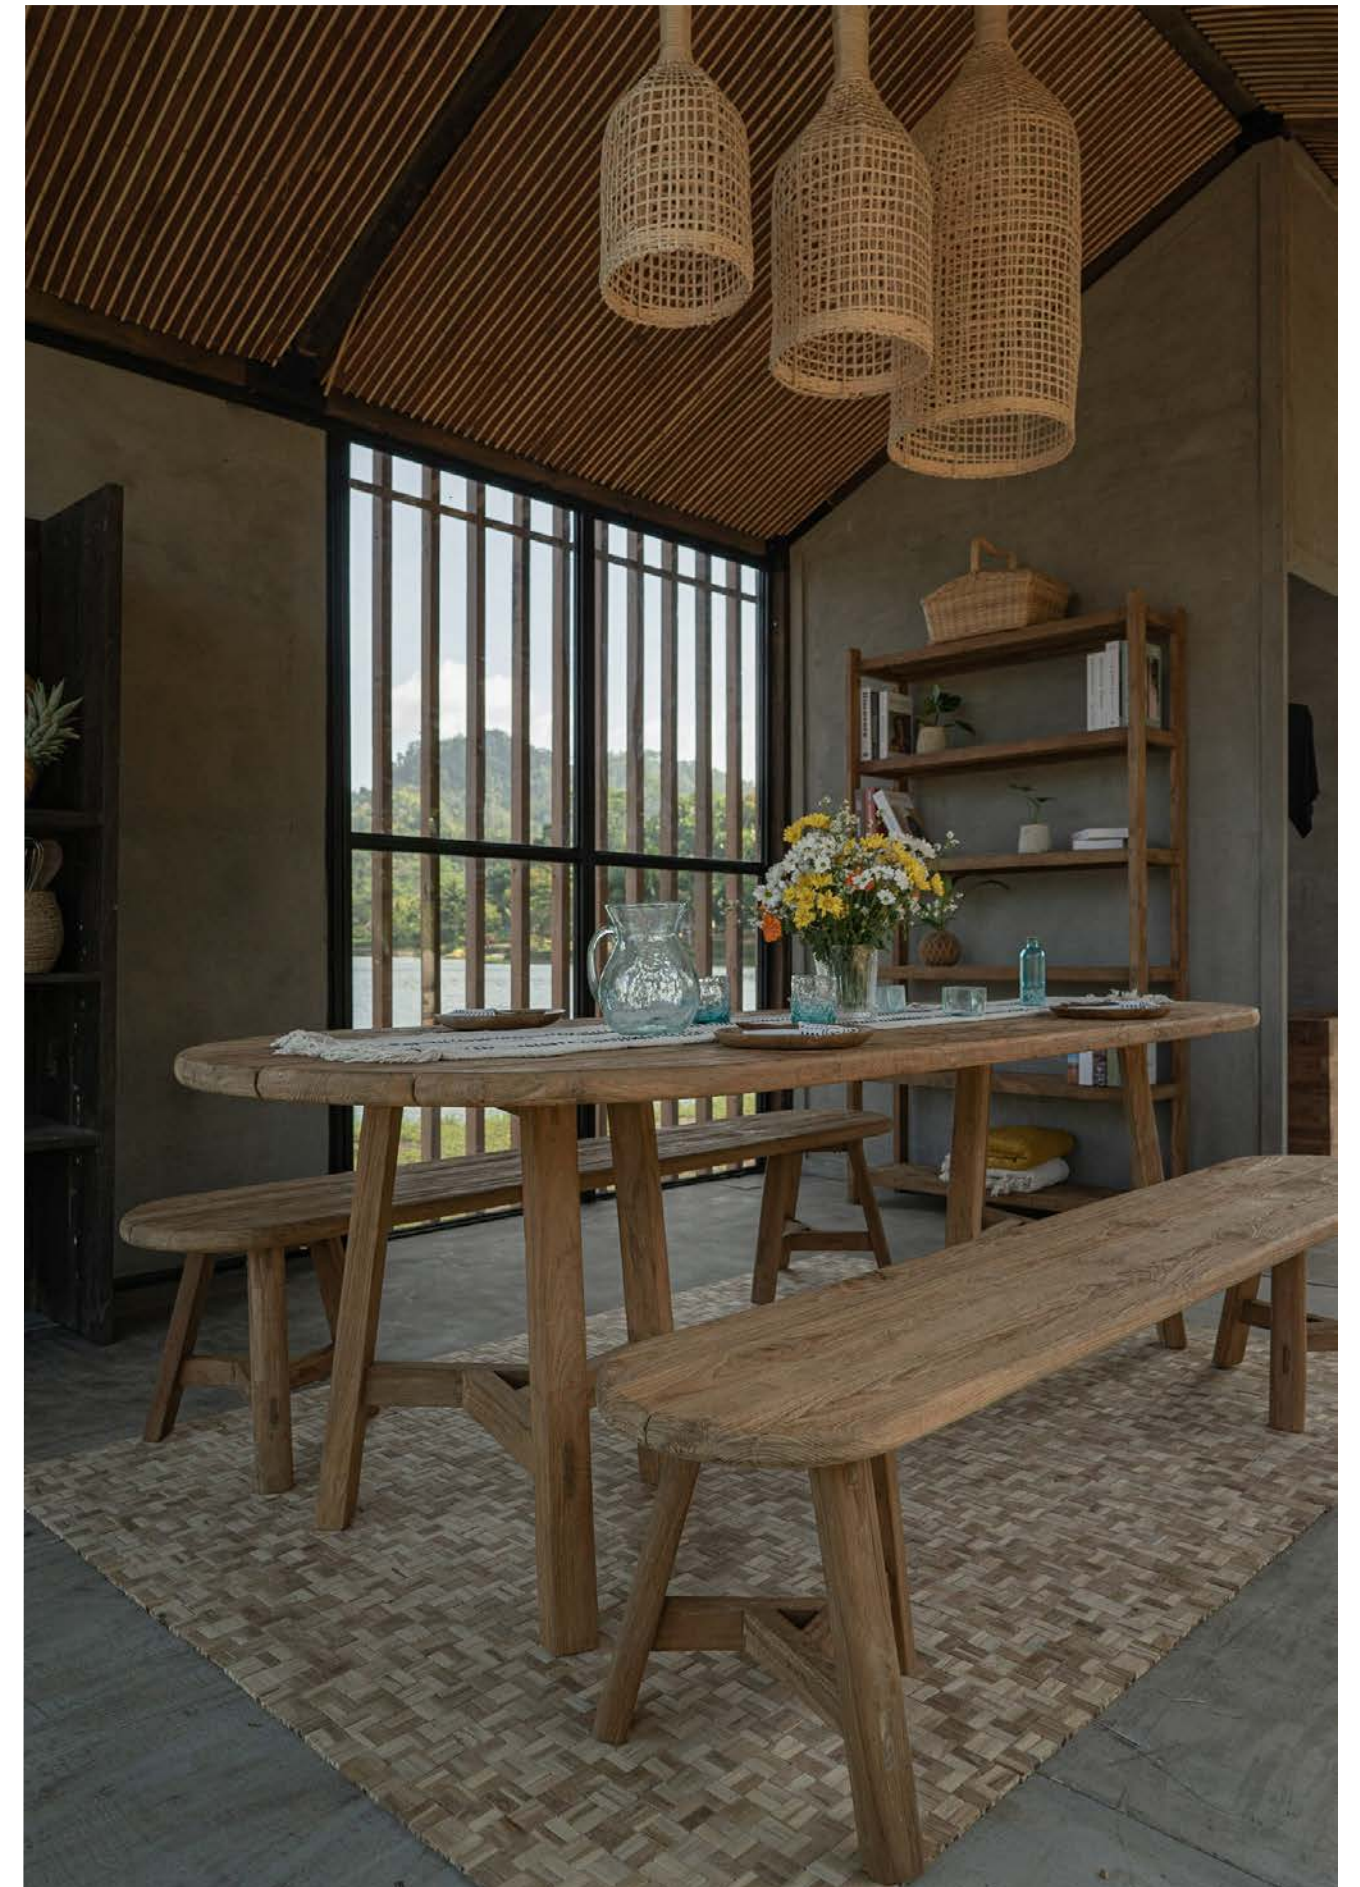

Order requests and deposits are taken to start production or hold items you have chosen from ready stock. We constantly keep our clients informed of the status of their orders through video calls & continuously follow up for quality and timely delivery. Once your order is ready, we email you the final photos of the finished goods before packing.

QUALITY CONTROL

Our Process

Our quality control team visits suppliers and performs a full quality control inspection. They ensure product quality by providing the raw materials that meet specifications and checks on breakages or wearouts for supreme final products.

DELIVER

Our Process

All manufacturing schedules for furniture and accessories are managed by us till the delivery date. We ensure to make your entire process experience smooth and efficient by following safety precautions while delivering your order. Our delivery team will do onsite coordination to accessorize and ensure that each element aligns with your design plan.

SERVICES WE OFFER

Tropika Furniture is more than just an intermediary between you and your suppliers. We provide very effective value-added services in the production and procurement process. Indonesia, China, Vietnam, Malaysia are our leading suppliers where we have tied up with many local manufacturers who can customize products for us. All purchases come with clearance support and hassle-free doorstep delivery, thus saving a lot of money when you shop for furniture and accessories. We keep our clients up to date on the progress of their orders through WhatsApp and emails. We ship your orders and take care of all the necessary legal customs documents, clearances, and transportation to get the products delivered to your doorstep.

Services

PICKUP & PACKAGING

Tropika Furniture collects your goods, wherever the location is in Asian countries & inspects them before shipping. We make sure to follow the export packaging norms including wood packaging for all fragile items, and professionally load your container without damaging the merchandise.

Services

IMPORT DOCUMENTATION

We take care of all your paperwork!!

International import and shipping require numerous high complexity documents. Tropika Furniture takes care of all the abstruse documents process on behalf of you.

Following documents are processed

- Bill of landing
- Packaging list
- Certificate of origin
- Commercial Invoice
- Bill of entry
- Certificate of pest control treatment

Services

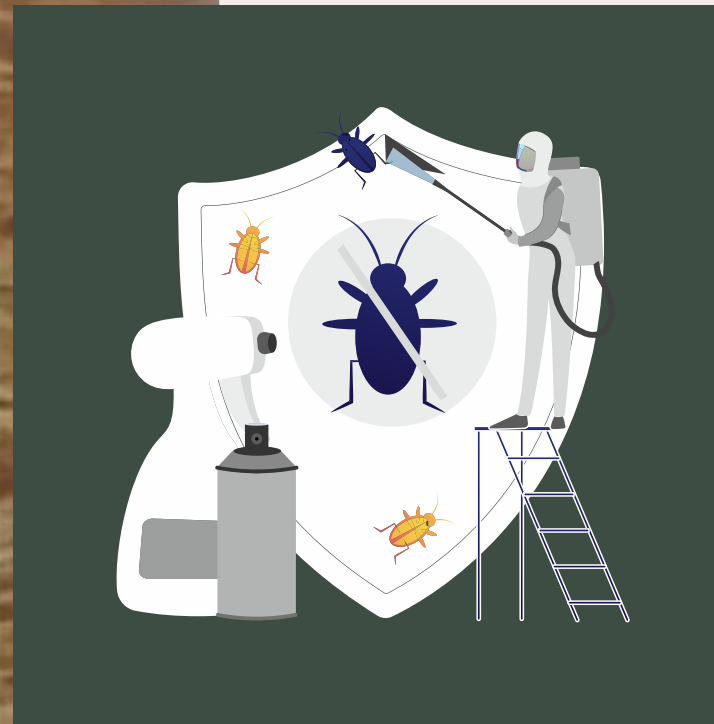

EXPORT LICENSES

An export license is an authorization that a government of a country gives to ship a product internationally. Post determining whether your products or items require an export license or not, we prepare the license documents needed to legally ship your goods from any Asian country.

Services

PEST CONTROL

Before loading your cargo, we follow stringent container fumigation and phytosanitary certification process as per specific protocols, norms, and requirements. We ensure to disinfect your goods to prevent the transfer of parasites, worms, and bugs, depending on the type of cargo. In addition to it, we also guard them with moisture absorber strips that are specifically designed and formulated to absorb moisture that can cause mold, mildew, corrosion to the contents of shipping and storage containers.

Services

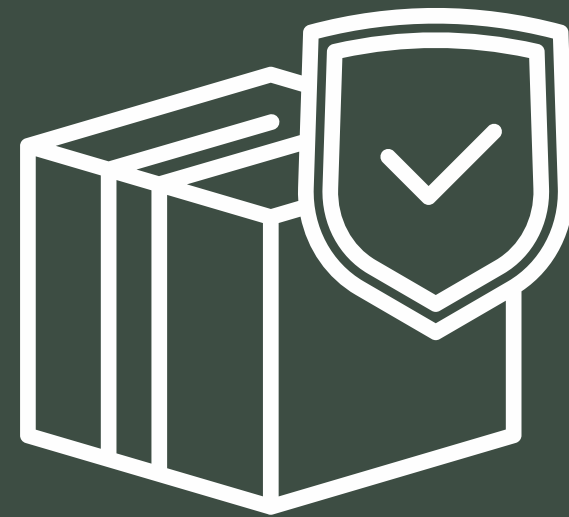

CUSTOM CLEARANCES

Our team takes care of your export customs clearance from Asian countries to India to ensure a safe and timely departure. Customs clearance includes preparing and submitting documentation required to facilitate export or imports into or out of the country. At any Asian international seaport, our team represents our client for customs assessments, examinations, payments of duties, and co-taking cargo delivery from customs after clearance.

Services

INSURANCE

Insurance is needed for many aspects of your import items via cargo. At Tropika Furniture we ensure all your goods are explicitly insured as per each country's norms. This risk insurance is covered right from the country of origin till they arrive at your doorstep including the warehouse.

Services

MONEY MANAGEMENT

It's a tedious job to process all the invoices from the suppliers. The team at Tropika Furniture offers money management services to our clients to complete the purchase transactions of their favourite imported furniture and decor products with ease. Our clients have the flexibility to do the entire transaction in Indian rupees.

RUBBERWOOD FURNITURE

Rubberwood is known for being durable and robust, making it a popular choice for furniture. One interesting thing about rubberwood is that it is an eco-friendly option because it is made from trees that have already served their purpose in producing rubber. It has a light color, similar to beech wood, and is easy to work with, allowing various finishes and styles. Rubberwood is also resistant to warping and cracking, making it a practical choice for everyday use. Processed rubberwood is very stable, with shrinkage and cracking kept to a minimum, making it great for furniture. Moreover, rubberwood has an incredible blonde to medium tan color.

MATERIALS USED

Exotic suggestions are alternated with elements of sophisticated essentiality. Traditional outdoor materials are combined with more modern ones that are made specifically for outdoor furniture. These materials are weather resistant but still seductive and romantic. Because, like a home, every outdoor area should have its own soul.

Putting particular emphasis on the environment and ecology, from the sources of the raw materials through the manufacturing procedures.

ALUMINIUM

We chose extruded aluminum for our metal collections because it's sturdy, durable, corrosion-resistant and rustproof. In order to resist corrosion, aluminum has a self-protective coating, which makes it a great choice for outdoor applications. It is also incredibly light and hence very simple to handle because of its density, which is only one-third that of steel.

This goes for rain, snow and the sun's ultraviolet rays as well. The majority of the time, we use it outdoors as a steel substitute.

Furthermore, it is really simple to maintain. It only requires the occasional short wash with a mild non-foaming detergent.

STEEL

Steel is mainly used for the legs and frames of the products. In some cases, we also use steel as aluminum insert in order to give more strength or weight on our frame. For the steel items, we always galvanized or give a primax powder coating to prevent it from rusting and to make sure it is protected in all weather.

STAINLESS

Stainless is mainly used based on customer request, which they desired that their products to look slim, chic, yet strong. Stainless Steel is Highly durable, Easy to clean, UV and weather resistant, and environmentally friendly.

SYNTHETIC WICKER

For all weather outdoor furniture, synthetic wicker can be used. All of our synthetic materials are specifically designed to withstand UV radiation without color fading and extreme weather conditions and can be left outside all year long. Synthetic rattan is waterproof and requires very little maintenance. When cleaning is needed, use soapy water and a soft brush or cloth. We use a high-end supplier for synthetic wicker, such as Rehau and Ecolene.

ROPE

Our outdoor rope is made of thermoplastic polypropylene (PP) fibres and has been developed to meet all standard requirements for outdoor furniture. It is made to endure extreme outdoor conditions such as sunlight UV exposure, extreme temperatures, mould and mildew. Rope is resistant to moisture, is colour fast, does not contain PVC, is washable and requires little maintenance. Rope also dries very quickly after getting soaked with rainfall. It is stylish, unique and has a soft touch, creating comfortable seating and stunning looks.

RECLAIMED TEAKWOOD

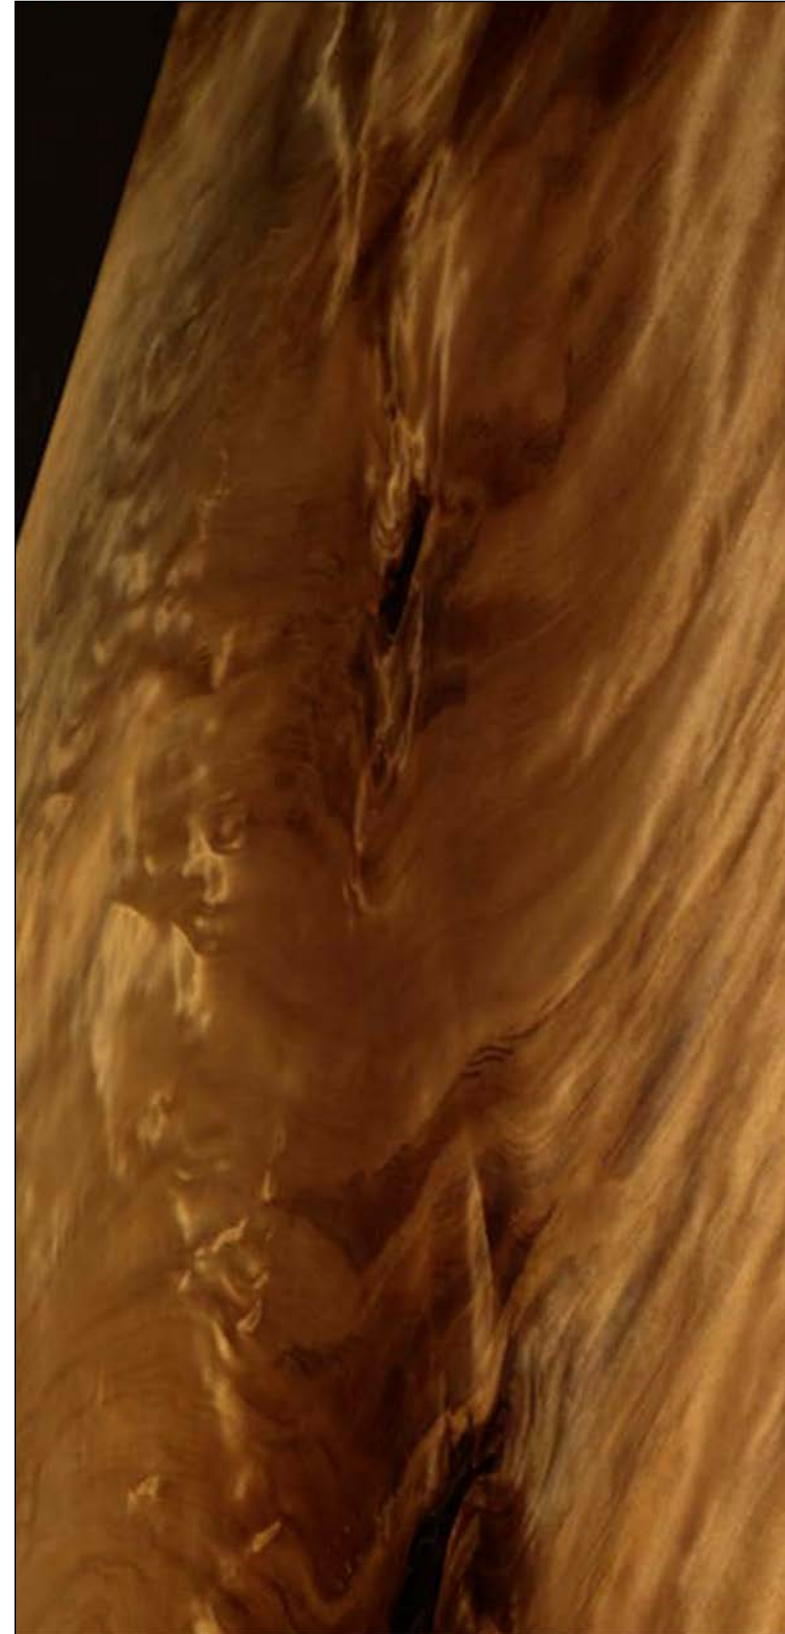

It starts with old growth wood that was harvested 200-300 years ago to build homes in Indonesia. As the years pass, the teak wood on the facade of the homes collects a patina that only intense sun and moisture can create. In the past decade, many of the neighborhoods throughout the Island nation of Indonesia have been razed to make way for newer and more modern buildings.

Instead of letting this gorgeous old growth teak go to waste, we purchase it before it can be destroyed. From these stacks of wood, we hand sort, hand sand and create some of the worlds finest, unique reclaimed teak products.

TEAKWOOD

For all weather outdoor furniture, synthetic wicker can be used. All of our synthetic materials are specifically designed to withstand UV radiation without color fading and extreme weather conditions and can be left outside all year long. Synthetic rattan is waterproof and requires very little maintenance. When cleaning is needed, use soapy water and a soft brush or cloth. We use a high-end supplier for synthetic wicker, such as Rehau and Ecolene.

SUAR WOOD

Suar is a fast growing species which can reach very spectacular size in a few decades and is not listed in the cites appendices or on the IUCN red List of threatened species.

Moderately heavy but extremely strong, suar is highly resistant to decay and dry-wood termites when processed properly. Its hardness and striking wood grains, similar to those of walnut, makes suar a great choice for outstanding conference and dining tables tops.

Also known as acacia in thailand, Raintree. Monkeypod in the US) – Kaiu Trembesi, Kaiu Kas or Kaiu Mae in Indonesia) suar originates from South America.

COMPOSITE WOOD

Composite wood is manufactured from a variety of materials. They usually contain the same woods that are used in lumber, but they are combined to make them stronger and more durable. It is also known as engineered wood.

Composite woods are often used in cabinets, furniture, sheathing, flooring and siding. They are less expensive than hardwood, and they are also weather-resistant when they have been painted or sealed.

QUICK DRY FOAM

Comfortable cushions take your seating experience to the next level. All our upholstery, cushion, and pillow are made from Quick Dry Foam from Urecel. Urecel Quick Dry have an open-cell structure which provide optimal drainage, high performance foam designed specifically for outdoor cushion. It gives the perfect seating solution for customers in climates with regular rainfall and high humidity.

OUTDOOR FABRICS

You can have a dinner party on a beautiful dining chair with a seat cushion or cuddle up between plush pillows while doing so. The level of your seated experience is raised by comfortable cushions.

Our cushions are equipped with zip-removable outdoor performance fabric. Our fabrics are water-repellent, breathable, and UV Proof. It is tactile yet durable, has industry-leading environmental characteristics, is easy to care for and offers long life – wherever it's used. We use a five-star and well-known fabric such as Sunbrella, Ateja, Batyline and Agora as our main supplier.

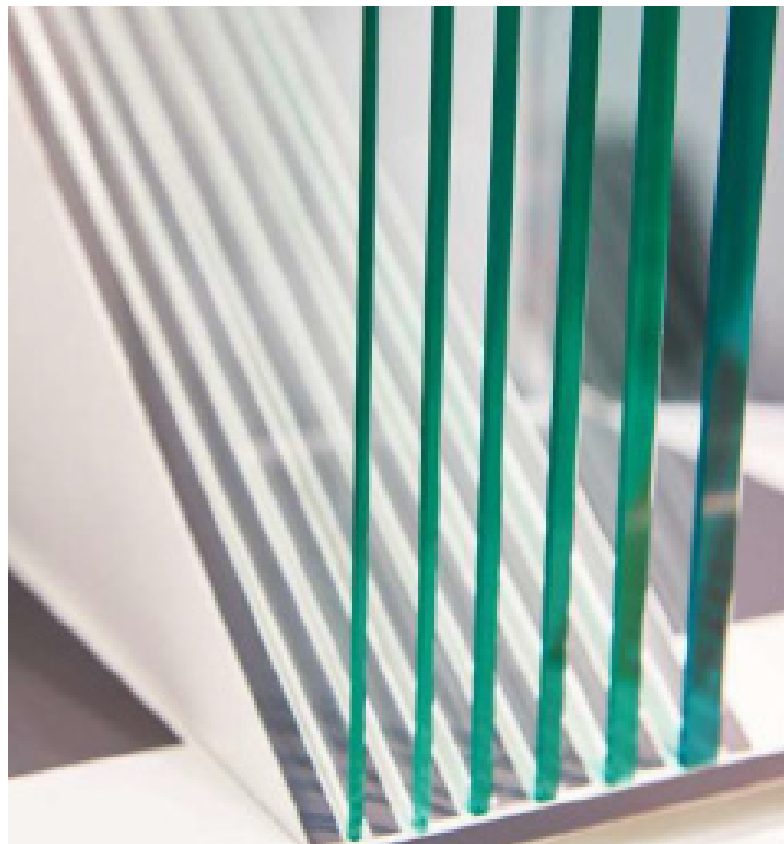

GRC

Glass-fiber reinforced concrete (GRC) is used widely for our tabletop applications. They are high strength, rigid and fully hand-brushed manually to desired color options. Coated with waterproof layer and overall flame retardant.

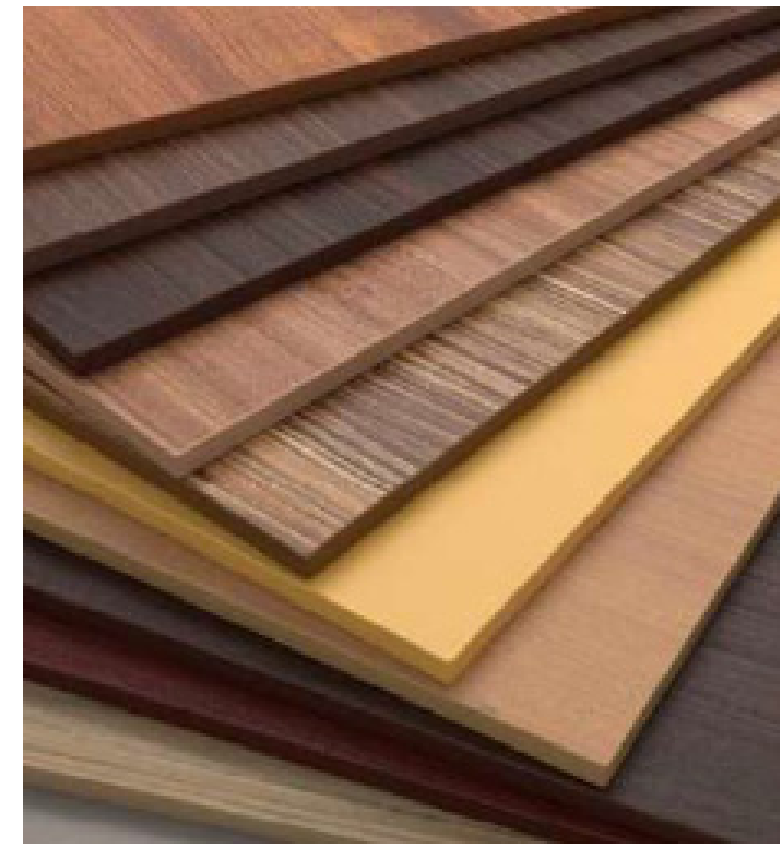

MARBLE

The beauty of marble is undeniable. Home improvements made with natural stone will always add value to residential properties. Marble has always been considered one of the best stones for homeowners who seek to boost the value of their investments.

TEMPERED GLASS

An open top table does not have solid support underneath it – the glass is supported by slats, racking, or shelf-type supports. Most open top tables require tempered glass to provide the structural strength to support the weight loads that may be placed on them.

OUTDOOR HPL

High pressure laminate (HPL) counter tops are a great option for non-extreme applications that still require a high level of functionality and durability when it comes to chemicals and heat, compared to other laminates.
